

HONOR Washing Toilet - standing version

We use the most advanced technological solutions in our intelligent toilets.

Thanks to this, we guarantee you and your loved ones care at the highest level.

We provide a cleaner and healthier - everyday - lifestyle.

DESCRIPTION

The Major & Maker HONOR shower toilet is a complete device consisting of a standing toilet equipped with advanced bidet functions.

A modern, wireless remote control with a memory of individual settings makes using the device a pure pleasure.

The product has an integrated, automatic water flushing system that draws water directly from the source. The standing toilet does not require connection to a concealed frame, thanks to which you will save on additional expenses and you will gain more free space in the bathroom.

The shower toilet is connected to a cold water supply, an electric socket and a sewage drain located behind the device (wall or floor drain located as close to the wall as possible).

There is no need to fix the toilet to the floor due to the weight of the product.

The device has a built-in heating system that provides unlimited access to hot water with the possibility of setting the temperature level and pressure of the washing water.

The heated seat not only provides a pleasant feeling, but also allows the body to relax and comfortably meet its biological needs.

In addition to the washing programs, the device is equipped with, among others, the function of drying with warm air, which allows you to abandon toilet paper once and for all.

The automatic flushing function is a very hygienic solution, as there is no need to press the flushing button. Water can rinse automatically:

- after getting up from the toilet

- before using the drying function, so that the process takes place in comfortable and clean conditions

- when you put your foot in the sensor area when the toilet seat and toilet lid are open

The built-in carbon filter actively and effectively absorbs unpleasant odors, thus increasing the comfort of use.

Major & Maker - perfect cleanliness at the touch of a button.

The Major & Maker company was established with the idea of creating automatic bidets.

The Major & Maker shower toilet is the answer to an easier, more comfortable and healthier everyday toilet.

Our devices provide the highest-class cleanliness and efficiency in caring for hygiene and comfort for you and your family at the touch of a button.

A shower toilet is an optimal combination of efficiency and comfort of use with an extraordinary design and simple, intuitive operation.

The Major & Maker HONOR shower toilet is a premium device that is currently one of the most technologically advanced electronic bidets available on the market.

Using the Major & Maker HONOR shower toilet reduces the risk of bacterial infections in the intimate areas. Water is the purest and most effective natural hygiene care product for even the most delicate part of the body.

Thanks to the HONOR Major & Maker toilet, you can easily take care of perfect hygiene for yourself and your loved ones.

FUNCTIONS

- Convenient and intuitive remote control. Access to selected functions on the button panel on the side. Built-in LED display.
- High-quality stainless steel washing nozzle with two independent wash water jets, resistant to dirt and corrosion.
- Self-cleaning of the washing nozzle before and after washing.
- Rear and front washing function using unlimited hot water (heating power: 1300W, water consumption 0.5l / min - 0.9l / min, temperature adjustment options: room, 30 ° C, 35 ° C, 40 ° C).
- Built-in washing water tank with a capacity of 0.3l to ensure a stable water flow pressure. Automatic water change to fresh water every 72 hours.
- Advanced capacity-flow heating system guarantees immediate heating and stable water temperature during washing.
- Additional ceramic valve that protects the inside of the installation against limescale.
- Option to switch the nozzle operation mode (spot washing, massage, turbo mode with intense water pulsation, which supports the defecation process).
- The ability to adjust the level of water pressure (4 adjustment options in the range 0.08MPa - 0.75MPa).
- Possibility to adjust the position of the nozzle deflection (4 adjustment options depending on your preferences).

MAJOR & MAKER

- Built-in stainless steel dryer. Drying function (heating power: 200W, temperature adjustment options: room, 45 ° C, 50 ° C, 55 ° C).
- Baby washing mode (quick washing and drying with working parameters suitable for children).
- Automatic mode (the entire cycle from washing to drying).
- Heated seat (heating power: 50W, temperature adjustment options: room, 30 ° C, 35 ° C, 40 ° C).
- ECO mode for energy saving in which the seat and water are not heated while the sensor detects no presence.
- The toilet seat and lid have a sag buffer, so they can close slowly and silently.
- The cover of the toilet seat and toilet lid is made of high-quality ABS materials, resistant to discoloration, bacterial deposition, UV radiation and fire.
- Built-in system that draws the flushing water directly from the source, so you can save space in the bathroom, as there is no need to build a rack with a tank. Rinsing water consumption: 4.5l.
- Function of mechanical flushing of water in the absence of electricity.
- The function of automatic siphon flushing of water and cleaning the interior of the toilet with a spiral jet.
- Built-in charcoal bamboo odor trap.
- For the sake of long service life, high-class electronic components have been used that are designed for failure-free operation for a period of 8 to 15 years.
- The function of illumination of the inside of the shell.
- Attractive appearance, the quality of the materials used and a uniform coating that makes it easy to keep the device clean.

SPECIFICATION

Dimensions: **685 x 395 x 485mm**

Weight: **41.6 kg**

Water intake from the source when flushing: **4.5l**

Built-in washing tank capacity: 0.3l

Hydraulic Requirement: **1.5-7.5 KGF**

Water flow: **≥20L / min**
